

PRIME ADVISORY NETWORK
LTD OF LONDON

Who We Are

A Global Network for Chartered Accountants and Lawyers

We are an International Network of Passionate and Experienced Professionals, directed by **Prime Advisory Network Ltd.**, based in London and operating under English Law.

Prime Advisory Network manages the network and accepts admissions only from members who have qualified titles in their country and have been verified by our staff.

Our Mission

“Our mission is to assist professionals all over the world in managing their activities through international networking.”

1. To assist, in all parts of the world and in the best professional manner, those entrepreneurs and companies that turn to the network for advice, ensuring that they receive the necessary support to help grow their businesses, with full respect for current legislation while preventing and mitigating any risk.
2. To disseminate a culture of “internationalization”, an important factor in development and success.
3. To assist firms all over the world in managing their international networking activities.

The Network

Prime Advisory Network is a professional network, comprised of expert accountants, auditors and lawyers qualified to provide a complete consultancy service to companies and groups operating in several industries.

Thanks to a completely innovative communication technology for client management, Prime Advisory Network represents the first “digital” global network of accounting firms in the world.

Professionals can cooperate worldwide with each other in an integrated way, by managing their clients all over the world, expanding their services and growing the number of their customers.

The NEED

Businesses usually can count on two types of highly specialized professionals in their internationalization process: **Lawyers and Chartered Accountants.**

Yet, a large part of them don't have an international network and the way the international market must be approached, they lack the means to support their clients who want to invest abroad.

The RESEARCH

We found that although professional networks already exist, none of them allows a community of professionals to actually share clients and commissions, with the possibility to assist them all over the world. We also found missing:

- a way of communicating and sharing documents
- a tool for members to propose their services globally
- a payment system allowing professionals to easily collect their fees.

The Solution

The Prime Advisory Network

We are proud to announce that we created a new, revolutionary way to help professionals to connect with each other, no matter what part of the world they are in. The system is a mixture of:

A formal agreement between the members and the Prime Advisory Network, where they commit to deliver their services to the clients. The network only selects the best professionals to collaborate with and manages all payments.

A certification and international accreditation system, where every professional is certified based upon his or her qualifying professional title, recognized in their own country, under conditions of equivalence.

Membership

Admission Requirements

Our Network is proud to be a highly professional network, made up of **Chartered Accountants, Auditors** and **Lawyers**, qualified to provide a complete consultancy service to companies and groups operating in several industries.

In our network we only allow Certified Accountants and high-profile firms, to offer better service to our customers and to make sure that you always choose from only the best and verified professionals as partners for your clients.

Membership

How it works

The firms which are part of the network function as a single body, sharing their knowledge and experience at a global level. This enables those clients who choose to make use of the network's services to benefit from high quality consulting in legal affairs, accountancy, fiscal matters and corporate services in all the main global markets.

The approach taken by Prime Advisory Network is highly innovative when compared to other international networks. The Network ensures that

when a client wishes to invest abroad, they can operate through a member firm operating in their own country.

Thus, a client from London can receive assistance in Japan through one of our collaborators based in London. Or a client in Beijing can receive support in Rio de Janeiro through a member firm based in Beijing. The client in Milan looking to invest in Moscow will use a Milan office as their point of reference.

Membership

How it works

By joining our network, members will be able to assist their clients abroad and also gain new ones from all around the world, thanks to other professionals who need to find a member partner in your country for their clients.

Every member has a professional account on Prime Advisory Network that allows them to browse the list of members and get in contact with colleagues from all over the world.

01.

Browse the list of other members in the network and find the perfect partner.

02.

Read the information on their profile.

03.

Check their fees for the services you need.

04.

Contact them and refer your Client to them.

Our Growth

Our network is growing rapidly. Coverage shown is from March 2017.
